

Automatic Water Pressure Booster Pump

This automatic water pressure booster pump increases water pressure for residential and light commercial applications. It features a durable motor, a pressure tank to maintain consistent pressure, and an automatic control system for ease of use.

Product Overview

High-Efficiency Pressure Boosting

This automatic water pressure booster pump is engineered to provide consistent water pressure for both residential and light commercial environments. It integrates an advanced automatic control system with a durable motor and pressure tank to ensure reliable performance. Designed for longevity and ease of use, it is the ideal solution for stabilizing water flow from wells, municipal supplies, or storage tanks.

Performance Features

Performance Advantages

- Good sealing mechanism
- Integrated pumped liquid cooling
- Low noise operation
- Floating ball exhaust valve
- Automatic start/stop functionality
- Thermal overload protection

Target Applications

Residential Water Systems, Light Commercial Use, Well Water Systems, Municipal Supply Boosting

Material & Build

Construction Highlights

Corrosion-resistant • Quiet Operation
