Product Overview

Automatic Water Pressure System

This self-priming peripheral pump system is designed to provide consistent, reliable water pressure for domestic and light commercial applications. Featuring a robust construction with a 19L pressure tank, the unit minimizes pump cycling to extend operational life and reduce energy consumption. It comes pre-wired and ready for installation, offering an efficient solution for water boosting, irrigation, and general transfer needs.

Technical Specifications

Tank Capacity	19 L
Pump Type	Self-priming peripheral pump
Key Features	Automatic Pressure Control, Thermal Overload Protection, Pre-wired, Compact Design

Construction & Materials

Material Composition

Component	Material
Pump Body	Cast Iron
Motor Bracket	Cast Iron
Impeller	Brass / Stainless Steel

Applications & Compatibility

Suitable Applications

- Domestic water supply
- Residential pressure boosting
- Light commercial water transfer
- Irrigation systems

Fluid Compatibility

Clean Water • Non-abrasive • Non-chemically aggressive
