

Automatic Water Pump Controller with LED Indicator

Automatic pump control unit designed for water pressure regulation. Features include an on/off switch, LED indicator, and pressure settings for optimal performance.

Overview

Professional Water Pump Control

The SKD-1A is a robust automatic pump control unit engineered to provide seamless water pressure regulation for both residential and industrial plumbing systems. Featuring an integrated LED status indicator and an intuitive ON/OFF toggle, it ensures consistent flow and reliable performance. This compact controller is designed for high-pressure environments, capable of handling systems up to 10 Bar.

Technical Specifications

Model Number

SKD-1A

Functional Features

- Automatic water pressure regulation
- Visual LED status indicator
- Manual ON/OFF control switch
- Suitable for residential and industrial use

Maximum Power

1.1 KW

Maximum Pressure

10 Bar

Operating Voltage

220V-240V~50HZ
