

# Automatic Water Pump

This automatic pump is engineered for efficient water pumping in various applications. It features automatic operation, ensuring consistent water pressure and supply.

## ADDITIONAL IMAGES

## Product Overview

### PLX Series Automatic Water Pump

The PLX series automatic water pump is engineered to provide reliable, automated water supply for a wide range of residential and commercial environments. It excels at drawing water from underground sources and wells, while also serving as an effective pressure booster for hotels, bathrooms, and high-rise buildings. Designed for versatility, this unit ensures consistent water circulation for both domestic use and essential industrial equipment.

## Technical Specifications

### Primary Applications

- Running water supply
- Underground water extraction
- Well water extraction
- Pressure boosting for hotels and bathrooms
- Industrial equipment water cycling

**Model Number**

PLX-128A

**Key Features**

Automatic Operation, Consistent Pressure, Robust Construction, Low Maintenance
