Product Overview

Industrial Flour Processing Solution

This automatic flour milling system is designed for high-efficiency grain processing, supporting both wheat and maize. The complete set includes advanced grinding, sifting, and pneumatic conveying stages to ensure high-quality output and consistent particle size. Engineered for reliability, the system is suitable for large-scale commercial plants and turnkey production lines.

Key Features

Core Components

- Roller mills
- Purifiers
- Sifters
- Pneumatic conveying system
- Automatic packaging unit
- Central control panel

Processing Versatility

Wheat Milling, Maize Milling, NShima Production, Injera Production, Ugali Production

Technical Standards

Warranty & Support

1-Year Quality Guarantee • 1-Year Free Spare Parts • Lifelong Service Support

Turnkey Project Inclusions

- Specialized design
- Installation
- Commissioning
- Worker training
