

Automatic Wire Cutting and Stripping Machine

This automatic machine delivers high-quality and high-precision wire processing. Its 4-roller driving mechanism and user-friendly controls ensure ease of operation.

Overview

High-Efficiency Wire Processing

The Automatic Wire Cutting and Stripping Machine is a versatile solution engineered for high-volume wire processing tasks. Featuring a user-friendly digital control panel, it allows for precise adjustments to cutting and stripping parameters, ensuring consistent and accurate results. Designed for reliability, the unit includes essential safety features like emergency stops and protective guards, making it an ideal choice for electronics manufacturing, automotive wiring, and cable assembly applications.

Key Features

Safety Equipment

- Emergency stop button
- Protective guards

Capabilities

Automatic Cutting, Automatic Stripping, Adjustable Rollers, Precision Control

Included Accessories

Included Tools

Part Name	Quantity
TGK inner hexagon spanner	1 set
