

Automatic Wire Cutting and Stripping Machine

The automatic wire cutting and stripping machine processes various types of wires and cables. It features a precision cutting mechanism and adjustable stripping parameters, providing accurate and consistent results.

Product Overview

High-Efficiency Wire Processing

This automatic wire cutting and stripping machine is engineered to handle a diverse range of wire sizes and cable materials with high precision. Featuring an intuitive control panel and robust construction, it ensures consistent results while maximizing operational durability. Designed for modern assembly lines, the equipment supports multi-wire processing to significantly enhance manufacturing productivity.

Technical Capabilities

Core Features

Precision Cutting, Adjustable Stripping, Multi-wire Processing, Programmable Control

Operational Safety

Safety Standards

- Operator protection system
- Equipment damage prevention
- Safety-interlocked operation

Performance Metrics

Efficiency Indicators

1 Multi-wire

Process Mode
