

Automatic Wire Cutting Stripping Twisting Machine

This advanced electronic machine features a compact design for processing more wires with higher precision. Cutting speed is adjustable to complete three sectors stripping requirements.

Product Overview

Advanced Wire Processing Solution

This advanced electronic wire processing machine offers a compact design with enhanced precision and processing capacity. It features an intuitive LCD interface for all debugging actions, significantly improving operational efficiency by over 30% compared to traditional models. With adjustable cutting speeds across 9 levels, it provides versatile stripping and twisting capabilities to meet diverse production requirements.

Technical Specifications

Performance Metrics

30 % Efficiency Gain	0.2 mm Cutting Error	220 W Max Power
--------------------------------	--------------------------------	---------------------------

Model Specifications

Feature	HWN-220	HWN-220+T
Dimension	450x450x360mm	450x720x360mm
Net Weight	40KG	60KG

Wire Handling Capabilities

- Cutting Length: 0.1-9900mm
- Wire Diameter: AWG16-AWG32
- Front Stripping Length: 0.1-30mm
- Rear Stripping Length: 0.1-50mm

Electrical Requirements

AC 110V-220V (50/60Hz)

Certifications

Compliance & Standards

CE • SGS
