

Automatic Wire Stripping and Cutting Tool

This automatic wire stripping and cutting tool is designed for efficient and precise wire preparation. It features adjustable stripping diameters to accommodate various wire gauges, hardened steel cutting blades for clean cuts, and ergonomic handles for comfortable use.

Product Overview

Precision Wire Preparation

This automatic wire stripping and cutting tool is engineered for high-efficiency electrical preparation. It features a self-adjusting mechanism that adapts to various wire gauges, ensuring consistent and damage-free stripping every time. Designed with hardened steel blades and ergonomic handles, it provides clean, precise cuts while maintaining user comfort during extended use.

Technical Specifications

Key Features

- Automatic wire size adjustment
- Hardened steel cutting blades
- Ergonomic handle design
- Damage-free insulation stripping

Operation

Automatic

Ideal Applications

Electrical Work, Electronics Assembly, DIY Projects

Blade Material

Hardened Steel
