

Automatic Wire Stripping Machine

This automatic wire stripping machine is designed for precision cutting and stripping of various types of wires. It features a programmable control panel, adjustable wire guides, and a high-speed cutting mechanism for efficient operation.

Product Overview

High-Efficiency Wire Processing

The automatic wire stripping machine is designed for precision cutting and stripping of various wire types. It features a programmable control panel for setting specific stripping parameters and high-speed mechanisms to ensure efficient, high-volume production. Built with safety and consistency in mind, this equipment minimizes wire damage while maximizing output quality.

Technical Specifications

Key Features

- Programmable control panel
- Adjustable wire guides
- High-speed cutting mechanism
- Integrated safety protections

Performance Metrics

1 Automatic
Operation Mode

Compliance and Usage

Recommended Use

High-volume processing, Precision stripping, Industrial
