

Automatic Wire Stripping Machine with Digital Control

This automatic wire stripping machine is designed for precision and efficiency in wire processing. It features a digital display, adjustable rollers and blades, and safety mechanisms for high-volume applications.

Product Overview

High-Precision Automatic Wire Stripping

The automatic wire stripping machine is engineered for precision and efficiency in professional wire processing environments. It features a digital control panel with an intuitive keypad for seamless parameter adjustments, ensuring consistent performance. Designed for industrial longevity, the machine includes robust safety mechanisms such as an emergency stop and an enclosed cutting area.

Technical Specifications

Performance

1 Full

Automation Level

Ideal Applications

- High-volume wire processing
- Varied wire size handling
- Multiple insulation types

Key Features

Digital Control, Adjustable Rollers, Adjustable Blades, Emergency Stop, Enclosed Cutting Area

Build Quality

Sturdy industrial-grade construction for high-volume applications
