

# Automatic Wire Terminal Crimping Machine

The automatic wire terminal crimping machine is designed for high-volume production. It crimps terminals on both ends of a wire simultaneously, increasing efficiency and reducing labor costs.

## Product Overview

### High-Efficiency Terminal Crimping

This full automatic terminal crimping machine is engineered for the high-volume production of wire harnesses, designed to significantly increase efficiency while reducing labor costs. It features the capability to crimp terminals on both ends of a wire simultaneously, streamlining the manufacturing process. With a user-friendly touchscreen interface and robust construction, it ensures reliability and ease of operation in demanding industrial environments.

## Key Features

### Operational Capabilities

- Automatic wire feeding
- Automatic wire stripping
- Automatic terminal crimping
- Simultaneous dual-end crimping
- Defective crimp detection

### Safety & Quality

Safety Sensors, Equipment Protection, Quality Control System

## Performance Metrics

### Production Efficiency

**2 simultaneous**

Crimping Ends
