Overview

Professional A/C Charging Station

This portable automobile A/C charging station is designed for efficient system maintenance, evacuation, and refrigerant charging. It features a high-performance 2CFM vacuum pump and a precision 5-valve manifold gauge set, ensuring reliable operation for automotive technicians. With versatile voltage options and compatibility with multiple common refrigerants, this unit provides a robust solution for workshops and mobile service applications.

Technical Specifications

Gauge Diameters

68 mm

Pressure Gauge

80 mm

Vacuum Gauge

Vacuum Pump Capacity

2 CFM

Power Options

110V, 220V

Manifold Type

5-valve manifold with sight glass

Compatibility

Supported Refrigerants

R12 • R22 • R134a • R404a

Hose Specifications

Hose Colors

- Red
- Blue
- Yellow
- Black

Standard Hose Length

72 inches

Hose Fitting Size

1/4" SAE
