

Automobile Heater Core

This heater core is designed for automotive air conditioning systems, functioning as an evaporator. It is constructed from durable materials to withstand temperature and pressure variations, ensuring efficient heating performance.

Product Overview

Efficient Thermal Management

This automobile heater core is engineered for optimal heat transfer within a vehicle's climate control system. Designed with a dense fin arrangement, it maximizes heat exchange efficiency to provide reliable cabin warmth. Built for durability, this component is constructed to withstand the high temperatures and pressure variations typical of automotive heating systems.

Technical Specifications

Core Size

224 mm
Length

152 mm
Width

32 mm
Depth

OEM Part Number

8D1819030A

Nissens Reference

6293014

Compatibility

Compatible Vehicle Models

- AUDI A4 Avant
- AUDI QUATTRO
- SKODA SUPERB (3U4)
- VW PASSAT (3B2)

Model Years

Vehicle Model	Year Range
VW PASSAT (3B2)	94-01
AUDI QUATTRO	80-91
SKODA SUPERB (3U4)	01-08
AUDI A4 Avant	96-01
