

# Automobile Heater Core

This automobile heater core is designed for efficient heat transfer. It features a compact design with aluminum fins and durable construction for long-lasting performance.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Heater Core

This automobile heater core is engineered for optimal thermal transfer, ensuring reliable cabin heating performance. Constructed with durable materials to resist corrosion, it features a robust design with aluminum fins to maximize surface area for efficient coolant circulation. Its compact form factor is specifically designed to facilitate straightforward installation while maintaining compatibility with heating systems for Subaru vehicles.

## Technical Specifications

Core Dimensions	355 x 176 x 32 mm
Compatible Vehicle Make	Subaru
Nissens Reference	6281007
TS Number	6281007

## Features

Key Features	Aluminum Construction, Corrosion Resistant, Efficient Heat Transfer, Compact Design
