

Automobile Heater Core

This heater core is a crucial component of a vehicle's heating system, functioning similarly to a small radiator. Hot coolant circulates through the core, and a fan blows air across its fins to warm the passenger compartment.

Product Overview

High-Efficiency Thermal Performance

This automobile heater core is engineered for optimal heat exchange within vehicle HVAC systems. Designed to fit specific Jeep Compass models, it features a durable construction that ensures efficient coolant circulation and reliable cabin heating. Its compact design and precise dimensions facilitate straightforward installation, making it an essential component for maintaining passenger comfort in cold weather.

Compatibility & Fitment

Compatible Vehicle	Jeep Compass
Nissens Reference	6279079

Technical Specifications

Core Dimensions

184 mm Length	174 mm Width	26 mm Thickness
-------------------------	------------------------	---------------------------

Reference Codes	DPI Compatible, OEM Standard
