Product Overview

Automobile Impact Resistant Bumper

This high-quality automobile bumper is engineered for both durability and aesthetic integration. Designed with impact-resistant composite materials, it provides essential protection while maintaining an aerodynamic profile. The unit includes precision mounting points, integrated sensor ports, and dedicated recesses for license plates, ensuring a seamless fit for vehicle assembly or replacement needs.

Design & Construction

Material Composition	Rigid Composite Plastic
Color	Dark Gray
Key Design Features	Aerodynamic Design, Impact Resistant, Integrated Mounting Points

Technical Specifications

Integrated Components

- Sensor ports
- License plate mounting area
- Fog light housings (Front model)
- Central grille with horizontal slats (Front model)

Performance Metrics

1 High

Impact Absorption Level
