

Automobile Instrument Control Module Housing with 9-Pin Connector

This control module housing is designed for use in automobile instruments. It features a 9-pin serial port connector and ventilation slots.

Product Overview

Automobile Instrument Control Module Housing

This high-quality instrument control module housing is designed for reliable performance in automotive electrical systems. It features a robust construction with an integrated 9-pin serial port connector, ensuring secure and stable data transmission. The unit includes ventilation slots to assist with thermal management and is engineered for precise mounting in vehicle dashboards.

Technical Specifications

Mounting Features

- Screw-hole attachment points
- Integrated ventilation slots

Quality Standard

High-Quality Material • Automotive Grade

Part Number

AZ9719580001

Connector Interface

9-Pin Serial Port
