

Automobile Laminated Windshields

Laminated windshields provide a crucial safety component for automobiles. These windshields offer enhanced protection and structural integrity.

Product Overview

High-Performance Laminated Windshields

These laminated windshields are engineered for durability, safety, and clarity in demanding automotive environments. Manufactured with advanced glass technology, they provide robust protection and reliable performance for a wide range of vehicle types. Designed to meet global safety standards, these windshields are exported to over 140 countries, ensuring consistent quality for international automotive markets.

Production Capabilities

Annual Production Capacity

20000000 pieces

Laminated Windshields

Manufacturing Bases

11 facilities

Market Reach

Export Markets

140 countries

Global Presence

International Export, Global Supply Chain, Automotive Aftermarket
