Product Overview

Advanced 2-Way Vehicle Security

This 2-way automotive car alarm system provides comprehensive security monitoring for your vehicle. Utilizing advanced FSK technology, it offers ultra-long distance control and full-time monitoring capabilities to protect against theft and unauthorized access. The system includes features such as alarm/mute arming, impact detection, and real-time status updates to ensure peace of mind for vehicle owners.

Key Features

Monitoring Capabilities

- 24-Hour Monitoring
- Battery Voltage Checking
- Full-time System Monitoring
- Status Preserving Functionality

Security Functions

2-Way Communication, Alarm/Mute Arming, Shock Sensor, Door Trigger, Footbrake Trigger, ACC Trigger, Car Locating, Remote Trunk Release

Technical Specifications

Core Technology

LoRa Technology • FSK Technology • High Anti-Interference

Remote Control

Rechargeable remote control with color screen and folding key option

Included Components

System Components

Component	Description
Control Module	Main system brain
Remote Controls	2-Way rechargeable units
Siren	Audible alert device
Wiring Harness	Includes fuses and relays
Sensors	Impact/Shock sensor, Antenna
