Overview

High-Performance AC Compressor

This automotive air conditioning compressor is engineered for efficient refrigerant compression and reliable climate control. Designed to meet or exceed OEM specifications, it ensures optimal fit and function for heavy-duty vehicle applications. The robust construction includes a multi-groove pulley for belt-driven operation and integrated electrical connectors for seamless sensor integration.

Technical Specifications

Voltage	24 V
Clutch Configuration	9PK / 131mm

Compatibility & OEM

OEM Reference Numbers	5412300611, 5412301211
Denso Part Number	447170-9110
Vehicle Application	Mercedes-Benz Actros
