

Automotive AC Receiver Drier

This automotive AC receiver drier removes moisture and contaminants from the refrigerant. It ensures optimal AC system performance with multiple ports for AC line and sensor connections.

Product Overview

Automotive AC Receiver Drier

This automotive air conditioning receiver drier is engineered to maintain system integrity by effectively removing moisture and contaminants from the refrigerant. Designed for specific automotive applications, this unit ensures optimal AC system performance and longevity. Its durable construction provides reliable operation under demanding automotive conditions.

Physical Specifications

Diameter	60 mm
Length	160 mm

Compatibility

Compatible Models	Ford Telstar, P4 Liata
-------------------	------------------------

Identification

Part Number	RDC-6018
