

# Automotive A/C System Switch

This A/C switch is designed for automotive climate control systems. It features robust construction with a rectangular plunger actuator for reliable performance and seamless integration into vehicle dashboards.

## Overview

### Reliable Automotive Climate Control

The RTK-1021 is a specialized A/C system switch designed for automotive climate control applications. Engineered for durability, it features a robust construction with a rectangular plunger actuator for consistent performance. This switch ensures seamless electrical connectivity to manage vehicle air conditioning systems, providing reliable comfort for drivers and passengers.

## Technical Specifications

Operating Voltage	12 V
Actuator Type	Rectangular Plunger

## Application & Compatibility

### Application Area

Automotive • Climate Control • Dashboard Integration

Vehicle Compatibility	Pick Up
Model Years	1988-1992

## Key Features

### Key Benefits

- Robust construction for long-term durability
- Reliable electrical connectivity
- Seamless dashboard integration
- Engineered for precise climate control

## Product Identification

Model Number	RTK-1021
