Product Overview

Automotive Steering Air Balance Spring

This rotary coupling device is engineered for automotive steering systems, ensuring seamless electrical connectivity during steering wheel rotation. It features a precision coiled flat cable assembly designed for reliability and consistent performance. This component is essential for maintaining proper steering functionality and safety systems within the vehicle.

Technical Details

Part Identification

- 346430AE7080126
- 10046430
- QN/XPL100001
- NC15-2-4-6

Compatibility Notes

Non-Navigation Model • 4S Compatible

Key Features

Rotary Coupling, Coiled Flat Cable, Steering System Component, Electrical Interface

Logistics & Quality

Packaging

Safe, protective cardboard individual packaging

Delivery

Quick delivery available
