

# Automotive Air Conditioning Compressor

This air conditioning compressor features a compact and lightweight design. It utilizes a non-contact oil membrane and direct suction, and is designed for high-pressure applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Automotive Climate Control

This automotive air conditioning compressor is engineered for efficiency and reliability in demanding transportation environments. Featuring a compact and lightweight design, it integrates seamlessly into vehicle cooling systems. With advanced non-contact oil membrane technology and high-pressure capabilities, it ensures consistent performance and effective climate control.

## Technical Specifications

Key Features	Compact Design, Lightweight, High Pressure Type, Direct Suction, Non-contact Oil Membrane
Primary Application	Transportation
