

Automotive Air Conditioning Condenser

This air conditioning condenser is designed for automotive applications. It dissipates heat and converts refrigerant from a gaseous to a liquid state, ensuring efficient cooling.

Product Overview

High-Efficiency Air Conditioning Condenser

This automotive air conditioning condenser, model LAOG003F, is engineered to provide optimal thermal performance for specific vehicle applications. Serving as a critical component in the cooling system, it effectively dissipates heat by converting refrigerant from a gaseous to a liquid state. Built for durability and precise fitment, this unit ensures reliable climate control operation.

Technical Specifications

Model Number	LAOG003F
Compatible Vehicles	2007 Acura RDX, 2008 Acura RDX, 2009 Acura RDX, 2010 Acura RDX, 2011 Acura RDX, 2012 Acura RDX
