

Automotive Air Conditioning Laminated Evaporator

This laminated evaporator is designed for automotive air conditioning systems. Its compact and efficient design maximizes heat transfer, ensuring optimal cooling performance.

Product Overview

High-Performance Laminated Evaporator

This laminated evaporator is engineered for automotive air conditioning systems, providing superior heat transfer efficiency for optimal cabin cooling. Its compact design ensures seamless integration into various vehicle applications while maintaining high durability. Built to resist corrosion, this component is a reliable choice for maintaining a comfortable and consistent climate control environment.

Technical Specifications

Dimensions

85 mm

Width

235 mm

Length

225 mm

Height

Model Identifier

SKCZ004-137

Vehicle Application

AVEO

Features

Key Features

- Laminated core construction
- High-efficiency heat transfer design
- Corrosion-resistant materials
- Compact form factor
