

Automotive Air Filter

High-efficiency air filter designed for automotive applications. It features a pleated filtration media to capture dust, pollen, and other airborne particles.

Product Overview

High-Efficiency Engine Protection

This automotive air filter is engineered to provide superior engine protection by effectively capturing dust, pollen, and other airborne particles. Its durable construction and pleated filtration media ensure reliable performance and improved airflow, which helps maintain engine efficiency. Designed for a precise fit, it acts as a critical barrier to keep your engine running cleanly and smoothly.

Performance Features

Engine Protection

2X Protection

Key Benefits

- Improves air flow
- Prevents dirt and dust entry
- Enhances engine efficiency

Compatibility

Compatible Vehicles

HYUNDAI Sonata NF (China)

Design & Construction

Design Details

- Pleated filtration media
- Durable construction
- Orange sealing frame for optimal fit
