Product Overview

High-Performance Automotive Alternator

This high-performance alternator is engineered to provide reliable electrical power for automotive systems, ensuring optimal vehicle performance and longevity. Designed for efficient energy conversion, the unit features robust construction to meet demanding operational requirements. It serves as an ideal solution for direct replacement or system upgrade applications, offering compatibility with standard charging systems.

Technical Specifications

Rated Voltage	28 V
Rated Current	80 A
OE Reference	ME221165
Lester Code	ME221165

Logistics & Terms

Accepted Payment Terms

TT • LC

Production Lead Time	30-45 Days
Packaging	Neutral packing, Customized
