

# Automotive Alternator for Vehicle Electrical Systems

This heavy-duty automotive alternator is designed for reliable power generation in vehicle electrical systems. It features robust construction with a metallic housing, a pulley for belt-driven operation, and external cooling fins for efficient heat dissipation.

## Product Overview

### High-Performance Automotive Alternator

This heavy-duty automotive alternator is engineered to provide reliable and consistent power generation for vehicle electrical systems. Featuring a robust metallic housing and integrated external cooling fins, it ensures efficient heat dissipation and durability under demanding conditions. Designed for versatility, this unit is an ideal solution for various automotive applications requiring a dependable electrical energy source.

## Technical Specifications

Rated Current	45 A
Rated Voltage	14 V
Rated Speed	4000 R/min

## Identification

Manufacture Date	2010-08-20
Model Number	2008-002
Serial Number	040743

## Key Features

Design Highlights	Heavy-duty construction, Metallic housing, External cooling fins, Belt-driven pulley
