

Automotive Auxiliary Water Pump

This auxiliary water pump enhances the cooling system of automotive engines. It circulates coolant to provide consistent temperature regulation, preventing overheating and ensuring optimal engine performance.

Product Overview

High-Efficiency Auxiliary Cooling

This automotive auxiliary water pump is engineered to enhance engine cooling systems by providing consistent coolant circulation and temperature regulation. Designed for durability and reliability, it prevents overheating and ensures optimal performance even under heavy loads or in hot climates. Its robust construction and efficient motor control make it an essential component for maintaining vehicle health and longevity.

Key Performance Metrics

Performance Highlights

12 V

Voltage

850 LPH

Flow Rate

5 KPA

Pressure

Technical Specifications

Material

PA66 GF30

Operating Voltage

12 V

Flow Rate

850 LPH

Pressure Output

5 KPA

Compatibility

Compatible Vehicle Models

- Mercedes Benz CL500 (2005-2013)
- Mercedes Benz CL600 (2005-2013)
- Mercedes Benz S350 (2005-2013)
- Mercedes Benz S400 (2005-2013)
- Mercedes Benz S450 (2005-2013)
- Mercedes Benz S600 (2005-2013)

OEM Reference Number

221 835 00 64

Quality & Assurance

Warranty

One year warranty

Key Features

Robust Construction, Efficient Impeller, Precise Motor Control, Easy Installation, Compact Design
