Product Overview

High-Precision Automotive Bearing

The DBF68933 automotive axle bearing is engineered for optimal performance and durability in demanding automotive applications. Designed with a precision rating of P0 and high-quality steel construction, this bearing ensures smooth, reliable operation under load. It is a robust solution for automotive systems requiring specific dimensional accuracy and long-term stability.

Dimensions

Inside Diameter	50.205 mm
Outside Diameter	58.233 mm
Thickness	26.9 mm

Technical Specifications

Model Number	DBF68933
Material	Steel
Precision Rating	P0
Seals Type	Open

Logistics & Terms

Delivery Time	30 days
Payment Terms	T/T

Key Features

Why Choose This Bearing

- Stable and high quality
- Competitive pricing
- Short delivery time
- Perfect after-sales service
