

Automotive Battery Charger and Booster

This portable battery charger and booster is designed for automotive applications. It is suitable for charging various types of lead-acid batteries and offers robust construction for durability and reliable performance.

Overview

Professional Battery Charging Solution

This portable battery charger and booster is engineered for high-performance automotive applications. Featuring robust construction for durability, it is designed to provide reliable charging for various types of lead-acid batteries. The unit includes intuitive controls such as a selector switch for precise voltage and rate adjustment, making it an essential tool for automotive maintenance and recovery.

Technical Specifications

Model	CB-30
Compatible Battery Types	Lead-Acid

Features & Controls

Monitoring

- Built-in ammeter for charging progress

Adjustment Controls	Selector switch for voltage and charging rate
Connection	Heavy-duty clamps

Build Quality

Construction

Robust • Portable • Durable
