

Automotive Battery Charger and Booster

This is a portable battery charger and booster unit designed for automotive applications. It is designed for charging and boosting car batteries, providing a convenient solution for starting vehicles with depleted batteries.

Product Overview

Professional Battery Charging and Boosting Solution

This portable battery charger and booster unit is engineered for reliable automotive applications. Designed for both charging and jump-starting, it offers a robust solution for vehicles with depleted batteries. The unit features clearly marked terminals and durable alligator clips for safe, efficient, and user-friendly operation in professional environments.

Technical Specifications

Primary Application

Automotive • Battery Charging • Jump Starting

Key Features

- Portable design for field use
- Robust construction
- Clearly marked positive/negative terminals
- Integrated alligator clips

Model Identifier

INCHARGER-8000
