

Automotive Battery Jump Starter

This is a multi-function DC power unit designed to jump start vehicles. It features heavy-duty cables and clamps for connecting to vehicle batteries.

Overview

Professional Grade Automotive Jump Starter

This rapid auto start battery charger is a high-performance solution designed for demanding automotive environments. It provides a quick and reliable jump start for vehicles with depleted batteries, ensuring minimal downtime in workshops or service centers. Built with heavy-duty components and a user-friendly interface, it offers both power and safety for professional operators.

Technical Specifications

Control Interface

- Analog Ammeter
- Voltage Selector
- Circuit Breakers

Primary Function

Rapid auto start and battery charging

Design & Portability

Connection Hardware

- Heavy-duty power cables
- High-tension battery clamps

Mobility Features

Wheeled Base, Integrated Handle, Portable Chassis

Safety & Protection

Safety Mechanisms

Circuit Breaker Protected • Heavy-Duty Insulation

Application

Target Applications

- Automotive workshops
- Fleet maintenance
- Emergency vehicle starting
- Battery recovery
