Product Overview

Automotive Bearing Assortment

This comprehensive assortment includes a variety of precision-engineered bearings and automotive components designed for optimal performance and durability. The collection covers essential parts such as water pump bearings, clutch release bearings, tensioner bearings, and needle bearings, making it suitable for diverse automotive systems. Each component is manufactured to meet stringent quality standards, ensuring smooth operation and extended service life for maintenance and repair applications.

Product Components

Included Bearing Types

- Water Pump Bearings
- Clutch Release Bearings
- Tensioner Bearings
- Needle Bearings
- Ball Bearings
- Roller Bearings
- Thrust Bearings

Primary Applications

Transmissions, Axles, Wheel Hubs, Rotating Machinery

Quality & Performance

Key Performance Features

Precision Engineered • High Durability • Friction Reduction • Extended Service Life
