

Automotive Blade Fuse

These automotive blade fuses are designed to protect electrical circuits in vehicles. The fuses have transparent housings for visual inspection and blade terminals for easy insertion.

Product Overview

Automotive Blade Fuse Overview

These standard automotive blade fuses are essential components designed to protect electrical circuits in vehicles from damage caused by overcurrent or short circuits. Featuring a transparent housing, they allow for easy visual inspection of the fuse element. They are equipped with two male blade terminals for secure insertion into standard fuse blocks or holders.
