

Automotive Blade Fuse

Automotive blade fuse designed to protect electrical circuits from overcurrent. It features a transparent blue housing for easy visual inspection of the internal element.

Product Overview

Automotive Blade Fuse

This automotive blade fuse is specifically engineered to protect low-voltage electrical circuits from overcurrent damage. It features a durable, transparent blue housing that allows for quick and easy visual inspection of the internal fuse element. Designed with standard blade terminals, it ensures a secure and reliable connection within automotive, marine, and various other electrical fuse blocks and panels.

Technical Specifications

Design Features

- Transparent blue housing
- Visual inspection window
- Standard blade terminals
- Overcurrent protection

Common Applications

Automotive, Marine, Low-voltage systems
