Product Overview

High-Performance Automotive Blower Motor

This automotive blower motor is engineered for reliable performance within vehicle heating and air conditioning systems. Constructed from durable PP TD 40 material, it is designed to withstand temperature variations and vibrations, ensuring long-term operation. The unit is optimized to provide efficient airflow, maintaining a comfortable cabin environment for drivers and passengers.

Key Features

Direct Replacement • Vibration Resistant • Temperature Resistant • Optimal Airflow

Technical Details

Compatible Part Numbers

- 1520095
- 1520096
- 060.70803.01
- 060.7080201

Material

PP TD 40 (Polypropylene with Talc reinforcement)

System Application

Heating System, Air Conditioning, Cabin Ventilation
