Product Overview

Heavy-Duty Automotive Brake Drum

This heavy-duty brake drum is engineered for reliable performance in automotive braking systems. Constructed from durable cast iron, it is designed to provide consistent stopping power and effective heat dissipation under demanding conditions. The unit features a precision-machined braking surface for optimal friction and wear resistance, ensuring safe and efficient operation.

Technical Details

Part Number	3464230601
Material	Cast Iron
Key Features	Precision-machined surface, Heat dissipation, Wear resistant, Heavy-duty construction

Installation

Mounting	Robust mounting flange with multiple bolt holes for secure axle hub attachment
----------	--
