

Automotive Brake Pad Set with Wear Sensors

This set of brake pads is designed for automotive braking systems, utilizing friction material bonded to a backing plate. It includes wear sensors that alert drivers when pad replacement is necessary, along with retaining clips for secure installation.

Product Overview

High-Performance Brake Pad Set

This automotive brake pad set is engineered for reliability and safety, featuring advanced friction material securely bonded to a high-strength backing plate. Each set comes equipped with integrated wear sensors, complete with wiring and connectors, to provide real-time alerts when replacement is necessary. Designed for seamless integration, the kit includes all essential retaining clips for a secure and stable installation within the brake caliper assembly.

Technical Specifications

Safety Monitoring

Integrated Wear Sensor

Component Type	Automotive Brake Pad Set
Key Features	Wear Sensors, Retaining Clips Included, Bonded Friction Material

Installation

Included Hardware

- Brake Pads
- Wear Sensors
- Retaining Clips
