

Automotive Brake Tube

These brake tubes are designed for automotive brake systems. They feature durable rubber hoses with metal fittings to ensure secure connections and reliable brake fluid transfer.

Product Overview

Automotive Brake Tube Assembly

These high-performance automotive brake tubes are engineered for reliable fluid transfer and system integrity. Featuring durable rubber hoses paired with robust metal fittings, they are designed to meet rigorous vehicle safety requirements. The assembly includes integrated metal brackets to facilitate secure, straightforward installation and ensure long-lasting durability in demanding automotive environments.

Technical Details

Construction Materials	Rubber Hose, Metal Fittings, Metal Brackets
Application	Automotive Braking Systems
