Product Overview

Automotive Bumper Impact Support

This high-strength steel bumper support is engineered for optimal impact resistance and vehicle safety. It features precision-placed mounting points for secure attachment and includes strategic reinforcements to enhance structural integrity and energy absorption during collisions. Finished with a durable black coating, it provides excellent corrosion resistance for long-lasting performance in automotive repair and aftermarket applications.

Compatibility & Fitment

Compatible Part Numbers

Vehicle Model	Associated Part Numbers
301	9675632280, 980739408
508	9672731080, 9672913580
3008	7104LE, 980152580

Supported Series

5008, 4008, 3008, 2008, 308, 408, 508

Technical Specifications

Material & Finish

- High-strength steel construction
- Corrosion-resistant black finish
- Enhanced energy absorption design
- Precision-engineered mounting points

Available Design Types

BSF Series • BSR Series
