Overview

High-Performance Climate Control Solution

This automotive A/C control assembly is engineered for precise climate management, ensuring optimal passenger comfort through reliable temperature and airflow regulation. Featuring intuitive rotary knobs and tactile push-button controls, the unit allows for seamless mode selection including defrost and recirculation. Built with durable materials, it is designed to withstand rigorous automotive environments while integrating easily into compatible vehicle electronics.

Key Features

Control Interface

- Rotary knobs for temperature adjustment
- Fan speed control dial
- Push-button mode selection
- Dedicated A/C toggle
- Defrost and recirculation functions
