

Automotive Clutch Disc

This heavy-duty clutch disc is designed for optimal torque transfer and durability. The sprung hub design absorbs vibrations and reduces noise.

Product Overview

High-Performance Automotive Clutch Disc

This heavy-duty clutch disc is engineered for optimal torque transfer and exceptional durability in demanding automotive environments. It features a robust friction material designed to enhance grip while significantly reducing slippage. The advanced sprung hub design effectively absorbs vibrations to minimize noise, ensuring smooth engagement and long-lasting performance across various vehicle applications.

Technical Details

Product Code	X0005
Key Design Features	Heavy-duty construction, Sprung hub, High-friction material

Performance

Performance Highlights

1 Optimal
Torque Transfer

1 High
Vibration Damping
