Product Overview

High-Performance Automotive Clutch Disc

This high-quality OE-standard clutch disc is engineered for optimal power transfer and durability in automotive clutch systems. Featuring a robust construction designed to withstand demanding operating conditions, it ensures smooth engagement and reliable performance. The design includes specialized vibration damping features to extend transmission life and enhance driving comfort.

Technical Specifications

OEM Reference	30100-43G10
Compatible Brand	Nissan
Materials	Aluminum, Rubber

Key Features

Design Highlights

- Sprung hub for vibration damping
- High-friction facings for enhanced grip
- Robust construction for durability
- Engineered for smooth engagement
