

Automotive Clutch Kit

This clutch assembly is a critical component in a vehicle's transmission system. It is designed to engage and disengage the engine from the transmission, allowing for gear changes and smooth starts and stops.

Product Overview

Automotive Clutch Kit

This automotive clutch kit is a critical component engineered for vehicle transmission systems. It facilitates the engagement and disengagement of the engine from the transmission, ensuring smooth gear changes and reliable vehicle operation. Designed for durability and precision, this assembly is an essential replacement part for maintaining optimal drivetrain performance.

Technical Specifications

Plate Dimensions (O.D. x I.D.)	227.2mm x 143.3mm
Spline Specification	As per standard configuration

Compatibility

Model Years	1993 • 1994
Compatible Vehicles	Ford, Mazda Truck

Cross Reference

Reference Numbers

Reference Type	Number
Factory Number	FC01809
Daikin Number	C70113
OEM Reference	FMC506
