

Automotive Clutch Kit

This high-performance clutch kit is designed for automotive applications. It includes a pressure plate, friction disc, release bearing, and alignment tool.

Product Overview

High-Performance Automotive Clutch Kit

This high-performance clutch kit is precision-engineered for demanding automotive applications, ensuring optimal torque transfer and long-term durability. The complete assembly provides a reliable solution for various vehicle models, maintaining consistent performance under rigorous driving conditions. Designed for seamless integration, this kit includes all essential components for a comprehensive drivetrain upgrade.

Kit Components

Included Components

- Pressure plate
- Friction disc
- Release bearing
- Alignment tool

Performance

Durability

Heavy Duty • High Torque

Application Focus

High-performance, Automotive, Optimal Torque Transfer
