Product Overview

High-Performance Clutch Assembly

This automotive clutch kit is engineered for reliable performance in manual transmission vehicles, specifically compatible with Isuzu and Mitsubishi truck applications. The complete assembly includes a precision-balanced pressure plate, a high-torque friction disc, and a durable release bearing. Designed for optimal clamping force and smooth engagement, this kit ensures long service life and consistent operation under demanding driving conditions.

Technical Details

Included Components

- Diaphragm spring pressure plate
- Sprung hub friction disc
- Ball-type release bearing
