Product Overview

High-Performance Clutch Wheel Hub

This automotive clutch wheel hub is engineered for reliable power transfer and smooth engagement within the clutch system. Designed with precision-machined components and robust materials, it ensures durability and optimal performance under demanding driving conditions. This component is compatible with specific heavy-duty engine applications, offering an OEM-quality solution for maintenance and repair needs.

Compatibility

Compatible Vehicles	Toyota Hiace, Pick Up, Forklift
Compatible Engines	4Y Engine

Logistics

Shipping Lead Time	72 hours after receipt of confirmation
Minimum Order Quantity	1 piece
